

International division power generation packages

Reliable & adaptable power generation systems

HH Consulting's turnkey modular diesel power generation packages are customisable for any environment and power consumption needs. Suitable for urban applications and close proximity to compounds, accommodations, hospitals and offices. Manufactured by top quality builders, all generators are in-line with HH Consulting's quality standards.

The generator clusters are accompanied by E-houses, outfitted with state-of-the-art switchgear including automatic synchronization equipment. All internal components are supplied by ABB and housed in HH Consulting-produced custom panels. The generator packages are available to purchase or for long-term lease. HH Consulting can also provide a full operations & Maintenance solution guaranteeing trouble free and reliable power generation for primary or back-up requirements.

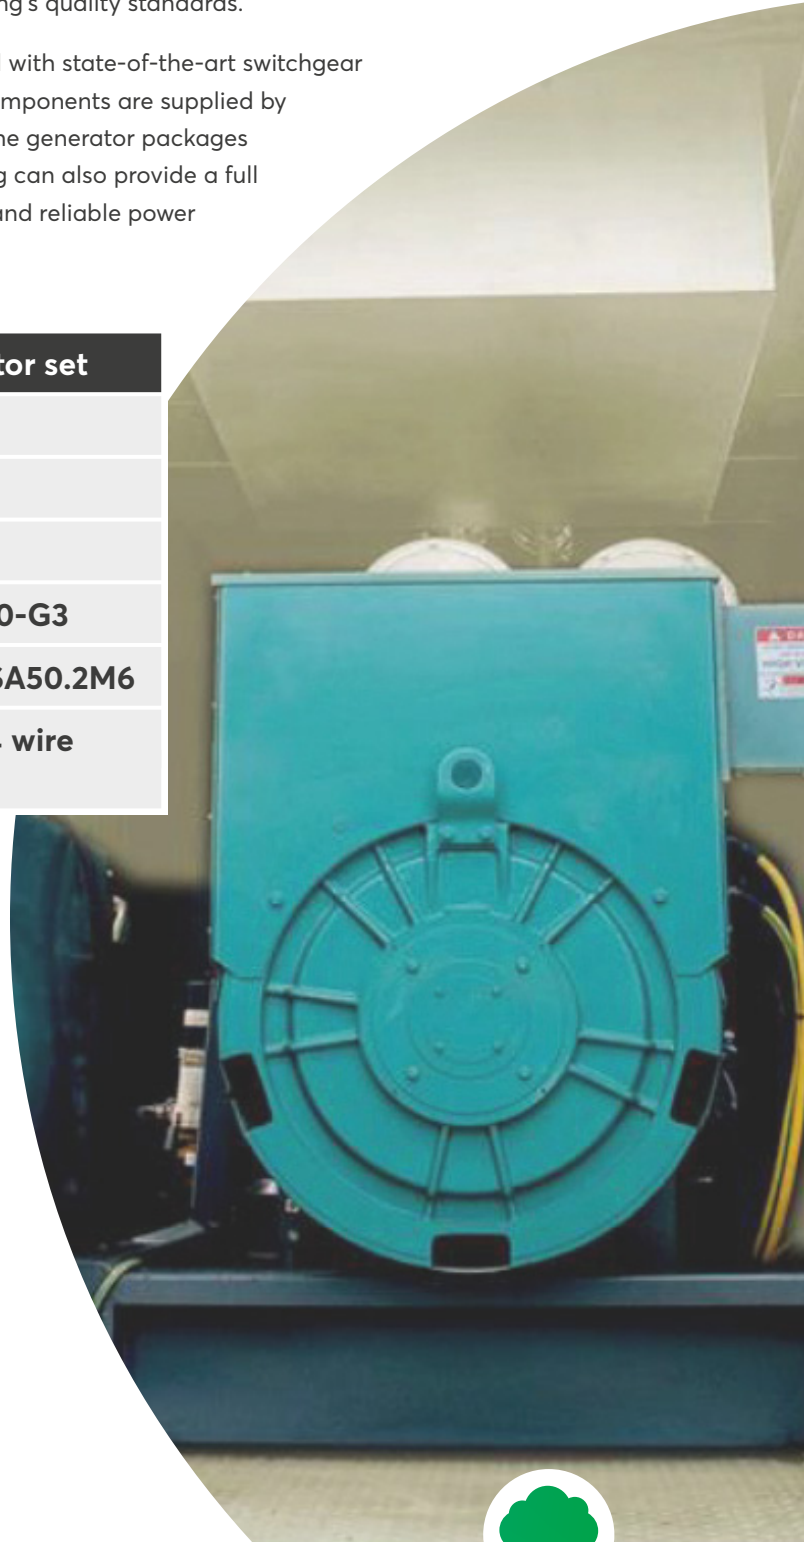

Full-service solutions are also available including operations and maintenance
